

THE VENUES WILL BE (ON THE BASIS OF THE MACRO-AREA):

July 2020 - Ospedale San Bassiano, Bassano del Grappa (Antonio Celia)

September 2020 - Clinica Humanitas, Milano (Antonio Saita)

January 2021 - Ospedale Careggi di Firenze (Alfonso Crisci)

May 2021 - Ospedale Cristo Re, Roma (Lorenzo Defidio)

September 2021 - Università di Foggia (Luigi Cormio)

December 2021 - Università degli Studi di Sassari (Massimo Madonia)

Management of urolithiasis is progressively becoming a complex sub-specialty in the urology field. The goal for the modern endourologist is looking a stone free operation, absence of complications and maximum comfort for the patient. This requires the perfect knowledge of all instruments available associated with the ability of adapting personal technique with patient and stone's characteristics. Furthermore, it is mandatory to have an adequate knowledge of all conditions causing stone formation, how to diagnose and prevent them.

The project Donatello wants to offer to trainees a comprehensive/intense course in the field of stone treatment which, we believe, is becoming fundamental for all urologists with interest in this sub-specialty.

This course is addressed to trainees at third year of Specialty training, it is three days long alternating lectures, hands-on on dry lab, live and semi-live sessions.

At the end of the course, a proficiency questionnaire will be performed. The trainee with the best result will be offered a subsequent training opportunity.

DONATELLO PROJECT

Ospedale San Bassiano, Bassano del Grappa - July 1-2-3

SCIENTIFIC ORGANIZATION

Antonio Celia, Bassano del Grappa

calcolosi-urinaria.it

DAY 1

14.00 Introduction (A. Celia)

“THE ART OF MODELLING THE STONES” lecture by 

14.30 Moderators: A. Porreca, M. Mangano, P. Ferrarese

Epidemiology of urolithiasis in Italy (L. Zeni)

Principles of lithogenesis and stone types (G. Gambaro)

Main metabolic conditions, standard and full metabolic screening (P. Lentini)

Urinary stones: medical treatment (L. Donello)

Bacteria and stones: etiopathogenesis and peri-operative antibiotic treatments (G. Rorato)

Imaging (US, Rx, CT, RMN, MAG3, DMSA) (C. Cicero)

16.30 *Coffe Break*

17.00 Moderators: M. Amenta, L. De Zorzi

Renal colic: medical treatment and management of complications (F. Visalli)

ESWL: all you need to know (S. Bucci)

RIRS: indications and instruments (L. Ruggera)

RIRS: technique step by step (D. Brotza)

18.00 *Dry lab: EST*

19.00 Closure of the day

DAY 2

08.30 Moderators: P. Beltrami, L. De Zorzi, F. Dal Moro

Live surgery: 3 RIRS (G. Mazzon, A. Caruso, D. Brotza)

13:30 *Lunch*

14.30 Moderators: C. Morana, V. Di Marco

Percutaneous/complex treatment approaches:

PCNL (V. Lacola)

e-CIRS (D. Maruzzi)

Open surgery (L. De Zorzi)

Lap/robotic (F. Dal Moro)

Complex stones (P. Beltrami, G. Mazzon, L. De Zorzi)

horseshoe kidney | caliceal diverticulum | duplex system

ectopic kidney | transplanted kidney | urinary diversion

spina bifida | pregnant women | encrusted stents

17.00 *Dry lab: EST*

18.00 Closure of the day

DAY 3

08.30 Moderators: P. Ferrarese, L. Ruggera, C. Morana

Live surgery: PCNL/e-CIRS (A. Celia, G. Mazzon, A. Caruso)

13:30 *Lunch*

14.30 Final questionnaire

15.30 Closure of the day

Selection criteria

Trainee at third year of Specialty training

EAU member

First come first served
